

Liebert Power Assurance Package

The Worry-Free UPS Solution For Your Network

Your Network Power Protection Deserves The Highest Level Of Support

Voice, video, and data are converging onto one mission-critical network. Simultaneously, your network is running more and more mission-critical applications than ever before — including IP Telephony, security/surveillance, video conferencing and net meetings. More than ever you are depending on your network power protection system.

New Technologies Have Made Every System Critical

As organizations embrace new IT and communications technologies, they are relying on these systems to be always on, always available. System downtime is not an option.

While today's smaller, rack-based UPS systems offer relatively trouble-free operation, the increased criticality of the systems they support has increased the cost of downtime. As a result, the need to manage and maintain these smaller UPS systems is increasingly important.

A New Solution Makes It Easier To Protect These Systems

Emerson Network Power now offers you the Liebert Power Assurance Package — a worry-free power protection solution for your network power requirements in the 1 kVA to 10 kVA range, complete with service and support tailored specifically to satisfy your needs.

More than just an extended warranty, the Liebert Power Assurance Package is an “insurance policy” on your critical power protection. It combines the best UPS in the business with the industry's premier service capability to offer you convenience, information and increased uptime.

But, most importantly, it guarantees total maintenance and repair coverage for five full years. Whether you're a small business planning for network expansion, or a larger corporation looking to retrofit your existing network, the Liebert Power Assurance Package will bring you worry-free power performance and protection.

¹Onsite system start-up by an Emerson Certified Technician. Includes removal and disposal of your existing UPS.

²One preventive maintenance visit completed after year 3 by an Emerson Certified Technician (visit scheduled by customer).

³Includes internal battery.

Liebert PowerSure PSI

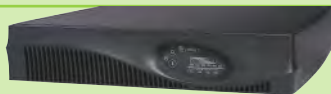

A compact, line-interactive UPS system that can be configured as a self-standing mini-tower or rack-mounted within a 2U space. Available in five sizes, including 1000, 1440, 1920, 2200 and 3000 VA.

Liebert PowerSure PSI

Liebert® GXT

A true on-line UPS that includes power factor correction, internal batteries, frequency conversion, unlimited external battery connectability and internal bypass capability. All this, housed in a compact 2U-size cabinet that cuts rack space requirements in half. Available in capacities from 500 VA up to 3000 VA.

Liebert GXT

Liebert GXT 6 kVA and 10 kVA UPS

Meets the need for higher capacities in smaller spaces. These true double-conversion UPS systems feature integrated maintenance bypass, as well as optional extended battery runtime. Designed for use in either rack or tower configurations, both units offer the smallest available solutions for these power capacities — the 6 kVA model at 120/208V output in 4U-size, or the 10 kVA unit at 120/208V output in a 6U-package.

6 kVA

Liebert GXT
10 kVA 208V

The Power Assurance Package Makes Sense In Today's IT Climate

As an IT professional, you have many different responsibilities. Now, we can lift one of those worries from your shoulders.

Convenience: we do the work

The package includes a compact, high-quality Liebert rack-mount UPS system. And, we provide system start-up and a five-year protection plan that offers 100% parts protection including internal battery and standard power output distribution module.

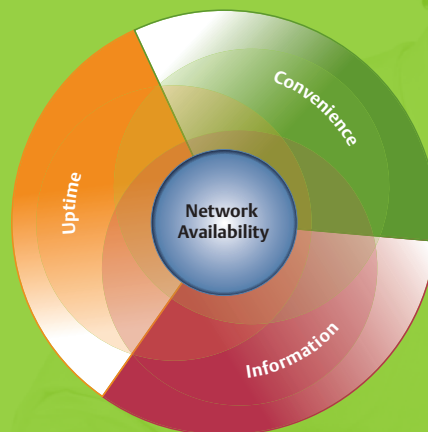

If anything goes wrong with your UPS during this five-year period, we'll send an Emerson certified technician to your site to repair or replace the unit.

Information: know what's going on with your power protection

Not only will we take care of your UPS units, we'll also provide complete service histories for all your power systems right at your fingertips, ideal for inventory tracking, budgeting, and financial planning.

Increased Uptime: that's the bottom line

The end result will be maximum uptime for your rack-based systems with an assurance that your power protection needs are fully covered.

Ensuring The High Availability Of Mission-Critical Data And Applications.

Emerson Network Power, the global leader in enabling business-critical continuity, ensures network resiliency and adaptability through a family of technologies – including Liebert power and cooling technologies – that protect and support business-critical systems. Liebert solutions employ an adaptive architecture that responds to changes in criticality, density and capacity. Enterprises benefit from greater IT system availability, operational flexibility, and reduced capital equipment and operating costs.
